*Cycle times represented above have been printed and timed using default print modes but are good faith estimates only. The data represents printing times only and does not include RIP processing time. Actual times may vary based on computer speed, memory, etc.
*Ink costs are based on best value pricing per DCS's published (8-13-15) US List pricing and print modes available at the time this sheet was published (10/23/15). Ink usages are good faith estimates only. Usage will vary depending on media type, file content, cleaning cycles, frequency of use and print modes used. Actual production usage should be determined by printer owner/operator based on production environment variables.
