

## Introducing the Classic Program for Direct Jet UVMVP Printers

You can join the MVP Classic Program by purchasing an eligible machine with an optional trade up within 9 months.

### What makes the Classic Program so special?

Classic MVP Program UV LED printer models have many benefits.

1. **What does 'Classic' mean?** The

Classic Program has been designed as a conduit for customers that need top notch UV LED printing capability, but want to limit their investment. Within 9 months of purchasing a MVP Classic printer, the purchaser may choose to trade up their Classic printer for a new

Direct Jet 1800z15, 1800z35, or 7200z model. At that point 70% of the purchase price of the Classic printer will be allowed as trade in value against a new Direct Jet 1800z15, 1800z35, or 7200z model at current MSRP. This credit cannot be used in conjunction with any other offer or discount.

2. **A Sound Investment.** Purchasing an MVP Classic UV LED printer is more than purchasing a pre-owned printer through a current owner or 3rd party service. Purchasers of a Classic Program printer can rest assured that their printer comes equipped with the quality and application abilities of the original machine.
3. **Quality Matters.** Every UVMVP Classic Program printer is re-entered into our production and quality control line. As such, each Classic printer meets all of the quality and repeatability testing requirements performed on a new Direct Jet UV LED printer. If a machine does not pass all of these tests, it will not be sold.
4. **What do the machines look like?** All UVMVP Classic Program printers are previously used machines. As such, some may have visible ink spots within the working areas and others may have scratched or scraped covers.
5. **A certified warranty.** All UVMVP Classic Program Printers are sold with a 6-month factory, parts only warranty.
6. **Classic Program Printers:** Available models include Direct Jet 1024UVMVP6. 1024UVMVP15 UV LED Printers.
