**NOTES:**
- Cycle times are good faith estimates only, based on print modes listed above. The data represents printing times only and do not include any RIP processing time. Actual times may vary based on computer speed, memory, etc. Ink costs are based on best value pricing per DCS’s published 04/26/17 US List pricing and print modes available at the time this sheet was published. Ink usages are good faith estimates only. Usage will vary depending on media type, file content, cleaning cycles, frequency of use and print modes used. Actual production usage should be determined by printer owner/operator based on production environment variables.
- Any object over 0.24" (610mm) must be tested for printing confirmation.
- All substrates should be tested for image receptivity, adhesion and durability, with final acceptance and suitability determined by the customer.
